Monday Night Net Script

Check-ins and topic discussion of your choice, with technical questions help at the end.

If you can't think of a topic, ask stations what is new and exciting in their world.

This is (your call sign). Good evening and welcome to the Monday Night Island Trunk Net. I am (your name) and I will be net control this evening. Before we start, is there any priority or emergency traffic?

This is a directed net, held every Monday at 8 pm on the Island Trunk System, please call in one at a time and allow net control to recognize you.

After the net we will move to 3746 kHz if propagation allows and continue on HF, Please join us there if you have the capabilities.

We are always looking for any new net controllers who are willing to volunteer. Please let us know if you would be interested, help and guidance is available.

Are there any announcements this evening?

Amateur stations from anywhere are invited to check into this net. Please use your call sign at the beginning, and the end of your check in as per regulations.

(Feel free to change up the alphabetic order of check ins from time to time)

Any stations that can not stay for the entire net, I will take your check in now.

Any more stations that can not stay for the entire net?

Any mobile stations that would like to check in now.

Any more mobile stations?

After general check-ins we will announce the topic for the evening.

Call signs starting with Alpha through Golf can check in now

Any more stations Alpha through Golf?

Call signs starting with Hotel through Papa can check in now

Any more stations Hotel through Papa?

Call signs starting with Quebec through Zulu can check in now

Any more stations Quebec through Zulu?

Continued on next page…

(Announce the topic and call checked in stations. Try to be fun and engage with them, thank them for their check in after they finish and pass it back to net control. Don't forget to repeat your own call sign from time to time to let late arriving stations know who is net control, as well as to conform to every 30 minute MAXIMUM interval regulations.)

This is (your call sign) net control. Are there any late or missed stations?

Let's move on and see if there are any check-ins that have a technical question they need help with, we might have someone on frequency that can help.

(If someone has a question you can not assist with, ask if there is anyone out there that can.)

I will now close the net at (time). Thanks to the (number) stations who checked in.

We will now move to 3746 Khz.

73 and good evening. This is (your call sign) I will now return the system to general use.

(Go to 3746 Khz for the HF portion of the net if you are capable, you are not required, there will be another net controller there.)
