

NARA's Fall Basic Course

Each year NARA's training Group runs a Fall Basic course.

Details of the course are:

- Ten, two hour sessions
- Monday's from 7pm to 9pm
- Delivered to your home via Google Meet
- Start Date - September 29 2025
- All you need to know for the exam
- Visually based presentations
- Typical Exam questions included
- Step by step instruction
- Designed for the beginner

NARA's course is designed for the beginner to radio and electronics. It goes step by step through the material that you need to pass the ISED Basic Exam. We assume nothing but only train for what you need to pass the exam. The NARA Basic course is not designed as a cramming course. There is a lot to learn to pass the ISED Basic exam, but we attempt to explain the subject matter as we go along.

NARA has four trainers:

Mike Donnelly VA7WPM (Student Liaison)

David Evans VA7DXX (Main course designer)

Katherine Banman VA7HN

Devan Banman VE7LSE

To join this course please email Mike at:

training@ve7na.ca

NARA also recognizes Tom VE7TOM for his contributions to two of the NARA courses.

Regulations Basic Licence

Introduction to Regulations

Course designed and presented by David VA7DXX
